

**RESTRICTION REQUIREMENT**

The Examiner has required restriction under 35 U.S.C. 121 and 372 to one of the following inventions:

Group I, claims 118-128, drawn to compositions comprising a compound of formula C4, classified in various subclasses of classes 544, 546, 548, and 549.

Group II, claims 129-133, drawn to methods of using compounds according to claim 118, classified in various subclasses of class 514.

Group III, claim 134, drawn to a stent, classified in various subclasses of class 514.

Group IV, claims 135-137, drawn to different methods of using compounds according to claim 118, classified in various subclasses of class 514.

The Examiner further requests an election of a single disclosed species of the compounds of formula C4 from the elected Group.

**ELECTION**

In response to the restriction and election of species requirement Applicants elect the invention of claims **118-128** (i.e., the invention of **Group I** as identified in the Restriction Requirement) and **compound C4.002** as shown in claims 127 and 128 as species.

In this regard, it is noted that the definitions for compound C4.002 in formula C4 depicted in claim 118 are as follows:

- X1, X2, X3 and X4 represent identical carbon units;
- Y1 represents NH and Y2 and Y3 represent different carbon units;
- R1 and R2 symbolize a substitution pattern of a respective partial ring, wherein R1 represents four identical substituents and R2 represents two different substituents; R1 being hydrogen; R2 being an unsubstituted methyl group linked to Y3 and a substituted methyl group linked to Y3; the two substituents on the methyl group linked to Y3 being 4-morpholino and 3-chloro-6-hydroxyphenyl.

All elected claims 118-128 read on the elected species.

Should there be any questions, the Examiner is respectfully invited to contact the undersigned at the telephone number below.

Respectfully submitted,  
Siegfried ANSORGE et al.
